Three moves

1) Duplicates -> loss: optimal bipartite matching (one slot per GT)

2) Compute -> design: AIFI (S5 only) + CCFF (conv fusion)

3) Init -> quality: U = ||P - C|| added to the loss

42.0 AP (DETR, 41M) -> 53.1 AP / 108 FPS (RT-DETR-R50)
